

KIOSK CONCEPT & DESIGN

Diwali Pop-Up Kiosk

For **Doft Candles** · 8 ft × 8 ft premium kiosk

Three design directions, material specification and an indicative costing sheet, prepared for your review.

Prepared by

What we are designing

A compact, premium kiosk for Doft's Diwali pop-ups, built to read as a luxury home-fragrance destination and to work hard in a small footprint.

8 ft × 8 ft

Compact island footprint (about 64 sq ft)

≈ 8 ft

Overall height, fascia included

Storage in kiosk

About 40 sq ft of secure stock within the unit

Backlit display

Warm-lit shelving for pearlescent candles

DOFT branding

Backlit fascia sign and counter wordmark

Billing point

Integrated counter station (hardware by ProMarcom)

A calm, premium, botanical feel

The design takes its cues from Doft's own world: soft ivory and rose, warm gold, and clean glass, with quiet Diwali warmth.

PALETTE

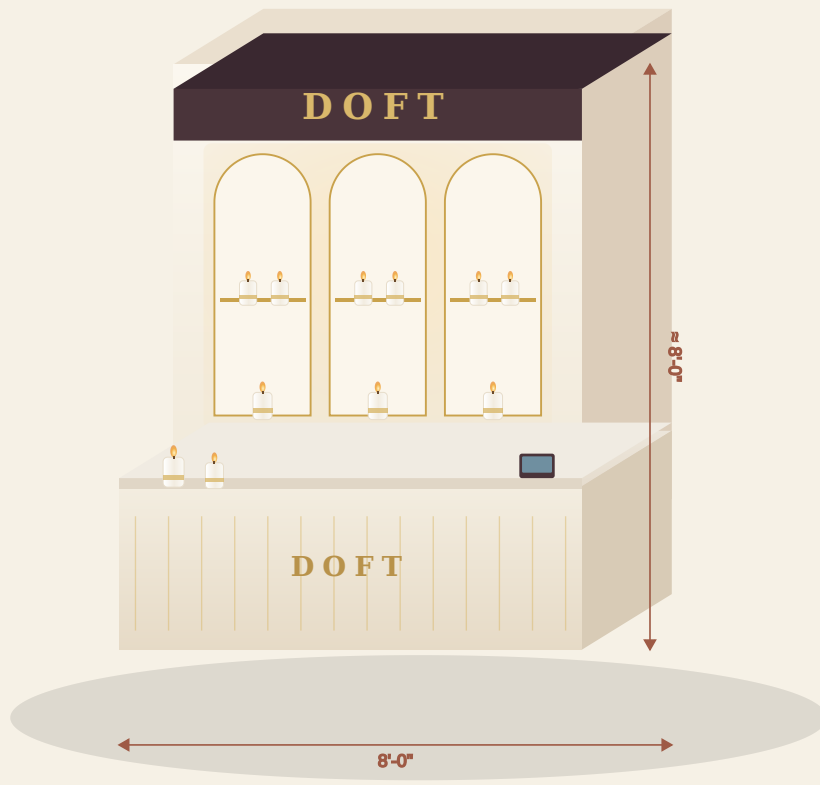

MATERIALS & FINISHES

Engineered marble Counter tops, in warm ivory	Brushed brass Edge profiles, reveals, shelf fronts
PU-lacquered MDF Body panels, smooth ivory finish	Warm LED Backlit shelving and fascia glow
Fluted detail On counter and side panels	Glass & botanicals Product display, dried-flower styling

The Arch

Arched alcoves, curved fascia, fluted counter

Indicative concept render. Final finishes and dimensions confirmed at production drawing stage.

THE IDEA

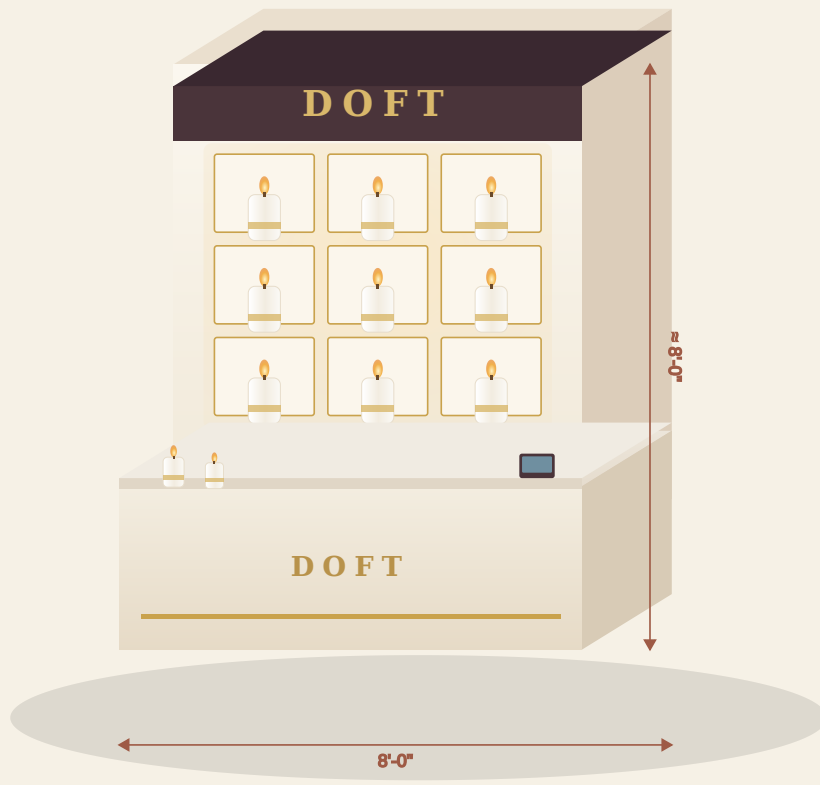

A warm, boutique feel. Three arched alcoves frame the candles like a fragrance gallery, with a curved header and a fluted counter that feels crafted and premium.

KEY MATERIALS

- Curved MDF fascia, PU-lacquered ivory
- 3 arched display alcoves, warm backlit
- Fluted front counter with brass reveals
- Engineered-marble counter top

The Gallery

Open backlit shelf grid, marble counter

Indicative concept render. Final finishes and dimensions confirmed at production drawing stage.

THE IDEA

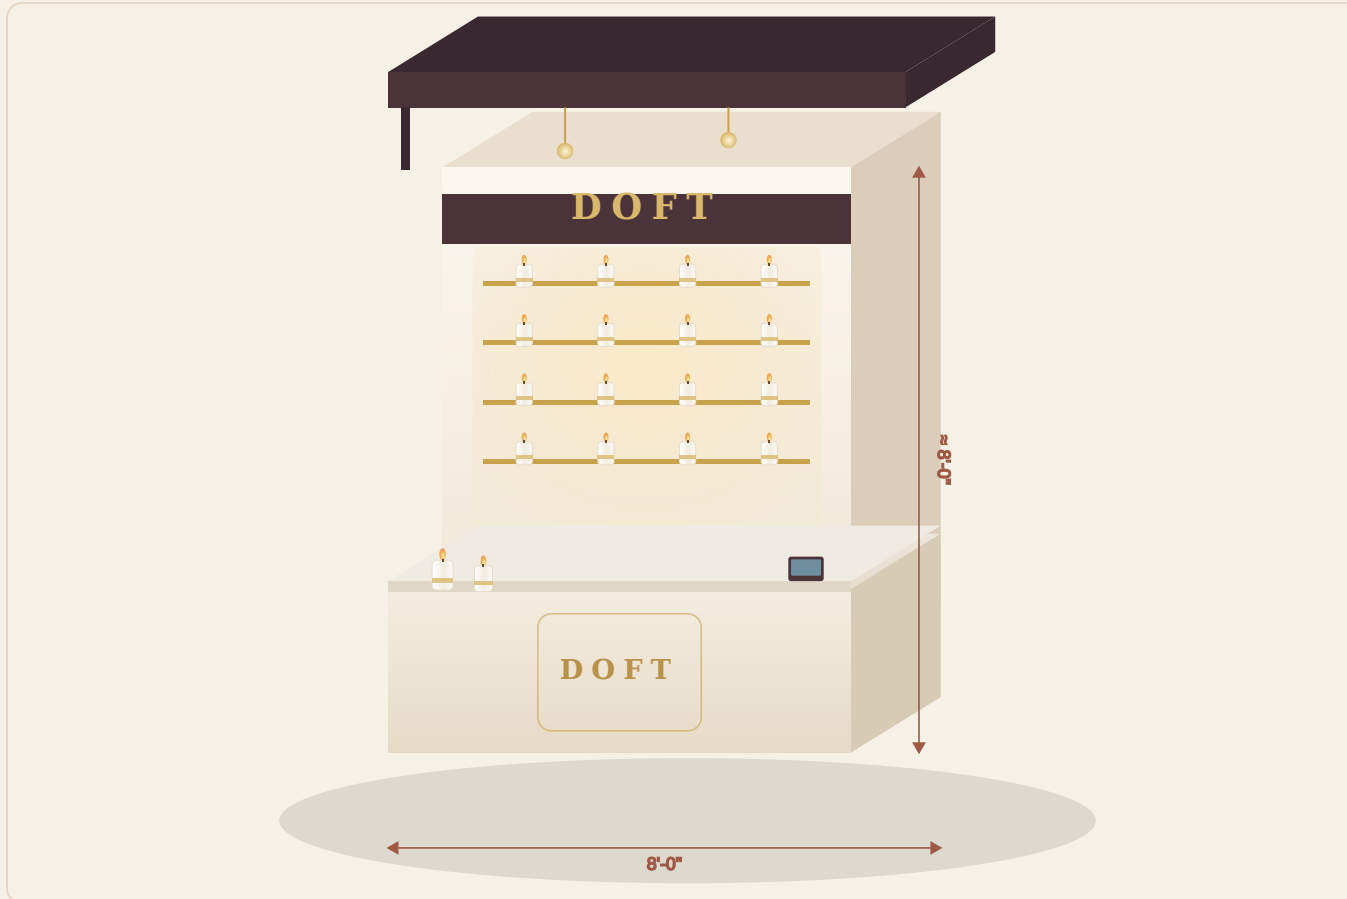

Clean and modern. An open grid of backlit cubbies turns the whole back wall into a glowing display, paired with a marble counter and a brushed-gold wordmark.

KEY MATERIALS

- Flat fascia, brushed-gold DOFT lettering
- 3x3 open backlit cubby grid
- Marble-top counter with brass inlay line
- Ivory laminate body, brass edge profile

The Pavilion

Canopy roof, floating ledges, pendant lights

Indicative concept render. Final finishes and dimensions confirmed at production drawing stage.

THE IDEA

Light and airy. A canopy roof and pendant lights lift the kiosk in a busy mall, while floating brass ledges and a rounded island counter keep it open and inviting.

KEY MATERIALS

- Overhead canopy in deep mauve
- Floating brass ledges, backlit wall
- Pendant feature lights
- Rounded island counter, brass trim

Plan & key dimensions

Plan view — 8 ft × 8 ft island

HOW THE SPACE WORKS

Display wall

Full-height backlit shelving across the back, with lockable stock storage built in behind and below.

Counter & billing

A single counter runs the customer side, with the billing point and a small wrap/pack area.

Staff zone

Two to three staff work comfortably between counter and wall; the rest of the team works the aisle.

Circulation

Customers approach from the open mall side; the counter controls flow and cash.

Services

Concealed electricals for lighting and billing; single power drop from mall supply.

Material & finish schedule

Summary below. A detailed, line-by-line specification with quantities is provided in the accompanying costing sheet (Excel).

ELEMENT	MATERIAL / FINISH	USED FOR
Structure & body	MDF / ply frame, PU-lacquered ivory panels	Framework, cladding, base
Counter	Engineered-marble top, fluted/laminate front, brass reveal	Billing counter + wrap area
Display	Backlit shelves / arched alcoves, brass shelf fronts	Product merchandising
Branding & signage	Backlit fascia sign, acrylic + brushed-gold lettering	Fascia + counter wordmark
Lighting	Warm LED strips, drivers, pendants (Option C)	Shelf, fascia and ambient light
Electrical	Concealed wiring, DBs, sockets for billing	Single mall power drop
Flooring & finish	Raised deck / vinyl finish, edge trims	Kiosk floor
Graphics & styling	Vinyl graphics, dried-flower styling props	Brand dressing

NEXT STEPS

From concept to build

1

Pick a direction

You shortlist one concept (or a mix of elements) to take forward.

2

Production drawings

We prepare working drawings and confirm final dimensions and finishes.

3

Costing sign-off

We firm up the costing sheet against vendor quotes and lock the budget.

4

Prototype & roll-out

We build a first unit for sign-off, then produce for all cities.

Our recommendation: Concept B (The Gallery) for its strong shelf presence and simple, cost-efficient build, with brass and marble cues carried across all cities.
